Sentron

MicroFET pH probe

9270-010

ISFET pH probe for vials and test tubes

Sentron offers a comprehensive line of high quality meters and probes for glass-free pH measurement. The SI meter and probe line is created around our proprietary ISFET pH sensor that offers accurate and reliable pH measurement for demanding applications.

The MicroFET pH probe is a probe with a barrel diameter of just 3 mm (0.1"), ideally suited for pH measurement in narrow vials. Thanks to it's barrel length of 110 mm (4.3") it can also reach to the bottom of long vials and test tubes. Applications for which Sentron's customers use the MicroFET pH probe include laboratory testing, monitoring of DNA sequencing and monitoring of biochemical reactions.

ISFET = glass-free

The MicroFET probe contains Sentron's non-glass ISFET (Ion Sensitive Field Effect Transistor) pH sensor. This sensing component is Sentron's proprietary design and has been improved continuously over the past 15 years.

In contrast to conventional glass pH electrodes, ISFET pH sensors are robust and do not require wet storage. This makes them well suited for many environmental, food and pharmaceutical applications. Even in areas like education or in laboratories, where glass pH electrodes can be used, ISFET pH measurement technology offers a much more durable and reliable solution.

Fast response time

ISFET pH sensors are fast because they measure directly at the surface. Sentron's SI series probes can give stable readings in less than 5 seconds for almost all samples.

Extremely robust

Sentron probes are built from high quality ABS, PVC and PEEK materials. They are resistant to many aggressive solutions and can withstand rugged use. At the same time, they are light weight and easy to handle

The probes have a polymer body snap-on type connector. Unlike DIN and bayonet type connectors, there are no moving parts nor screw thread that can be damaged.

The position of the ISFET and reference electrode has been designed to be clog and pollution resistant. In the event debris has accumulated on the sensor it can be easily cleaned with water and a brush.

Sentron probes are provided with protection against Electrostatic Discharge (ESD) ensuring measurements continue even in harsher electrostatic environments.

Easy handling

The ergonomic design makes the probe easy to hold. Its reduced weight and soft flexible cable allow it to be manipulated freely.

Comprehensive probe line

The MicroFET is part of a comprehensive probe line that meets a broad range of pH measurement needs.

ConeFET: Robust general purpose probe. 3280-010

CupFET: Probe for measurements of small 3200-010 liquid samples.

LanceFET: Steel tipped probe for penetration and measurement of non-liquids such as meat and fruit.

LanceFET+H: Equal to LanceFET but with large 2274-010 handle for additional grip.

MiniFET: Compact and sturdy probe with a 9202-010 5mm (0.2") diameter barrel, ideal for embedded application.

MicroFET: Laboratory probe with a very small 9270-010 3mm (0.1") diameter barrel that fits

3mm (0.1") diameter barrel that fits test tubes and mini-cuvettes.

Highlights

• ISFET = glass-free

• Fast response time

Extremely robust

Easy handling

MicroFET pH probe

Sentron

9270-010

Sentron is an innovative technology company specialized in the development and production of small sensors for medical and analytical applications. The company leverages more than 15 years of experience to develop and produce its high quality ISFET pH and pressure sensors. Peripheral equipment for the sensors, like measurement instruments, are designed, developed and produced in house as well.

Sentron is ISO 13485:2016 certified for the development, manufacture and sales of sensors, subassemblies and meters for the determination of physical and chemical measured values in the engineering field, including medical applications.

Sentron is part of Welling, a Dutch high tech company with activities in sensor solutions and medical devices. Please visit www.wellinq.com for more information.

Please contact one of our distributors or visit our website for more information about the company, potential applications and for probes and accessories available for the pH meter.

Specifications

	ConeFET 3280-010	CupFET 3200-010	LanceFET 2270-010	LanceFET+H 2274-010	MiniFET 9202-010	MicroFET 9270-010	
General description							
General fluids (low viscosity)	✓	✓	✓	✓	✓	✓	
Semi fluids (low to medium viscosity)	✓	✓	✓	✓	✓		
Pastes and semi solids (medium to high viscosity)	✓		✓	✓			
Piercing applications (normal to medium force penatration)			✓	✓			
(high force and stabbing penatration)				✓			
General beakers and containers	✓	✓	✓	✓	✓	✓	
Deep containers (up to 140 mm)	✓	✓	✓			✓	
Small sample volumes (one drop ~20 µl) Narrowvials / test tubes (as small as Ø 3 mm)		✓				✓ ✓
